FOREWORD TO THE NINTH EDITION

Australian people are now showing a commendable inclination to favour the use of musical aboriginal names for their homes, and the idea could perhaps be extended to other things or places for which an Australian name would be desirable, with advantage to the furthering of the growth of a distinct national feeling.

No profound, or indeed any special knowledge of Australian aboriginal lore or etymology is claimed by the compiler of this little book, but much sifting of lists of words, and a good deal of research among old books and journals, many now out of print and hard to come by, and of old hand-written records, was needed to find suitable words that had appropriate meanings for our purpose.

To provide words that would "run trippingly," and have a meaning or reference that might be used to name a particular place or thing, was the aim, so this little list is again offered, this time in an enlarged form, offering about 3,000 words and meanings of various things and matters, including a great many Australian aboriginal place-names and their meanings.

The compiler wishes to thankfully acknowledge the assistance rendered to him by the Royal Historical Society of Victoria, at Melbourne, also for the help tendered to him by the Archives Department of the Public Library of Western Australia at Perth.
